

AMD Athlon™ Processor

AMD Processor In A Box

The AMD Processor In A Box Includes:

- AMD Athlon™ processor
- Heatsink and fan unit
- Assembly and installation manual with AMD's recommended motherboard listing
- AMD bezel logo
- A three-year limited warranty
- Certificate of Authenticity

Build a Better PC

The AMD Processor in a Box product, featuring the award-winning AMD Athlon™ processor, comes with a separate heatsink and fan unit. The heatsink and fan unit is assembled, with an attached strip of thermal interface to provide the thermal conditions required for your systems. Assembly and installation are quick and easy.

The boxed processor is factory sealed to ensure authenticity of your AMD Athlon processor. The Certificate of Authenticity included in the box validates that you have purchased an authentic AMD Athlon processor. Plus, we stand behind our product with a three-year limited warranty, offering peace of mind for you and your customers.

The processors undergo extensive testing for compatibility. Hardware and software tests are performed in AMD's internal compatibility lab. Microsoft® and XXCAL also conduct independent testing in their labs to evaluate compatibility with the installed base of x86 software and operating systems.

The AMD Athlon processor—featuring a 200MHz or 266MHz system bus, and full-speed, performance-enhancing cache memory—is among the most powerful processors for today's and tomorrow's consumer and business applications. More importantly, the AMD Athlon processor's revolutionary design helps strengthen the longevity of your customer's computer system investment.

Why Buy From Authorized Distributors?

AMD understands that as a reseller, a reputation for reliability and service is your most valuable asset—it's what keeps your customers coming back. As a microprocessor supplier, we place an equal level of importance on reliability and service so you can build a solid reputation on systems using AMD products.

Investing in quality AMD products from an AMD Authorized Distributor makes good business sense. When you buy from an alternative supplier, you risk getting chips that have been remarked or mishandled somewhere in the pipeline—problems that are invisible until the part fails to perform in your customer's system. AMD understands that service calls are costly. When you buy from our Authorized Distributors, you can count on receiving quality AMD products.

Purchasing From an AMD Authorized Distributor Provides:

- The confidence that your AMD processor is marked accurately and the internal architecture matches the speed on the package
- A three-year limited warranty
- The advantage of special value-added services and training provided by select AMD Authorized Distributors
- The opportunity to participate in AMD promotional programs
- The option to buy only as much product as you need and the potential to purchase your product with distributor financing
